Office Action Summary	Examiner	Art Unit			
	/Erma Cameron/	1792			
The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the c	orrespondence address			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 6-8, 10-13 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over CA 2307565.

'565 teaches a dimerdiol (meth)acrylate in a radiation cured coating composition (see Abstract; pages 2-4). The degree of esterification appears to at least overlap with that claimed by applicant. The flatting properties of the composition are inherent to its components.

3. Claims 6-8, 10-13 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 10 - 218946.

See Abstracts and partial machine translation.

'946 teaches a dimerdiol di(meth)acrylate in a heat or radiation curable coating (see Abstracts; claims; [0004]-[0006]). The degree of esterification appears to at least overlap with that claimed by applicant. The flatting properties are inherent to the coating composition.

Application/Control Number: 10/553,183

Art Unit: 1792

4. Claims 9, 14 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over CA 2307565 or JP 10 – 218946, either taken in view of Sigel et al (6572932).

Page 3

'565 and '946 are applied here for the reasons given above.

Neither teaches the use of a solid flatting agent.

'932 teaches silica as a solid flatting agent in an acrylate based coating composition (see Abstract; 4:42-62).

It would have been obvious to one of ordinary skill in the art to have incorporated the silica flatting agent of '932 into the '565 or '946 compositions for those instances where further gloss control was desired.

Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Application/Control Number: 10/553,183 Page 4

Art Unit: 1792

6. Claims 6-16 are provisionally rejected on the ground of nonstatutory obviousness-type

double patenting as being unpatentable over claims 15-26 of copending Application No.

10/553483. Although the conflicting claims are not identical, they are not patentably distinct

from each other because each is a (meth)acrylate- and dimerdiol-based flatting composition.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting

claims have not in fact been patented.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to /Erma Cameron/ whose telephone number is 571-272-1416. The

examiner can normally be reached on 8:30-6:00, alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Timothy Meeks can be reached on 571-272-1423. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.
